

School Psychologist

Mission Statement

School psychologists advocate for and support learning and social/emotional health for all students.

School Psychologists help to improve student outcomes by:

- Consulting with parents, teachers and administrators to assist with academic and behavior concerns
- Using data to develop, monitor, and adjust interventions for students who need interventions
- Participating as part of the Student Support Team process at the schools they serve
- Assisting schools to prepare for and respond to crisis situations
- Conducting psychoeducational evaluations/reevaluations for students who are referred for special education services
- Provide training to school staff when requested
- Collaborating with school staff to help remove barriers that interfere with school attendance and participation
- Demonstrating Leadership
- Promoting a Respectful Environment For Diverse Populations
- Demonstrating Knowledge of the School Environment, Child Development, and Curriculum and Instruction to Improve Student Achievement
- Supporting Student Learning Through the Use of a Systematic Problem-Solving Approach
- Reflecting on Practice- accountability for managing and delivering comprehensive school psychology services
